

A faster way to process HELOCs and home equity loans

Process HELOCs and home equity loans with our automation-driven origination solution. The Origence platform provides end-to-end home equity lending, either as a standalone offering or delivered alongside the Origence mortgage LOS and POS. The result is powerful and efficient home equity lending with a frictionless application process that keeps your borrowers coming back.

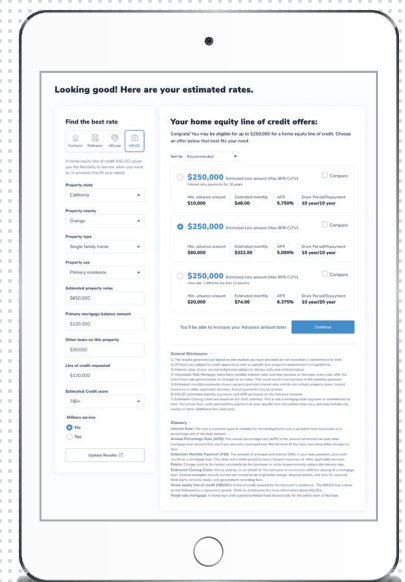

User Experience

- > **Personalized rate quotes:** Potential borrowers can easily and anonymously receive a pricing quote pre-application without having to log in (if desired)
- > **Self-guided application experience:** Borrowers can autonomously complete the dynamic application that configures to their chosen loan type
- > **Complete post-application experience:** After applying, applicants will be taken to a post-app page with their decision, status, and the ability to upload necessary documents

Automation

- > **Differentiated workflow:** Set up your HELOC and home equity loan workflows differently from your first mortgage workflow to ensure they don't get held up by cumbersome processes
- > **Automated pricing:** Potential borrowers get pricing according to your policies without ever needing to speak to anyone at your institution
- > **Automated vendor ordering:** Automated third-party provider product and service ordering reduces manual touches, paving the way for increased throughput

Transform your home equity lending experience with Origence, an end-to-end digital mortgage platform built to bring you a new level of speed, efficiency, and user experience.
