

Automated mortgage fulfillment to increase lending performance

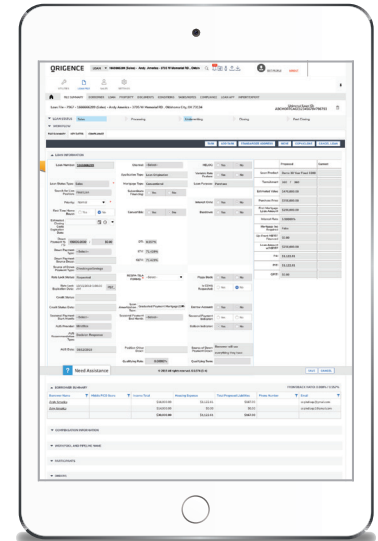

Process and underwrite loans with a new level of speed, efficiency, and quality

We've innovated and automated nearly every step of the mortgage fulfillment process. The result is a significant increase in productivity gains thanks to new breakthroughs in the automation of workplans, document processing, compliance, and time-consuming tasks that previously plagued the origination process. With the Origence Mortgage LOS, you can equip your lending team with the most powerful LOS available in the marketplace.

Transform your mortgage production and start processing and underwriting with a new level of speed, efficiency and quality. From the mundane to the complex, tasks across multiple roles have been streamlined and automated to take the pressure off lending teams. Origence makes lending teams stronger, loan decisions smarter, and closing times faster.

Explore the Origence Mortgage LOS and see how lending teams can take advantage of the perfect blend of automation, integration, compliance and communications in one easy-to-use platform.

Document Processing Automation

- > Automation of document and service ordering – Credit, VOI, VOA, VOE, 4506T, and other verifications
- > Document-to-data transformation – OCR, ADR, and machine learning
- > Automation of document stacking and delivery
- > Automation of document and data ingestion

Compliance Automation

- > Compliance checks at various stages of the process
- > Dynamically-generated compliance conditions
- > Fee management automation
- > Change-of-circumstance detection and re-disclosure

Workplan Automation

- > Required document identification
- > Dynamic tasking, conditioning and reconditioning
