

# Origence arc OS

## A comprehensive consumer loan and account origination system

Enjoy the breakthrough performance that arc OS automation and configurability deliver.

With Origence arc OS (formerly Lending 360), you can maximize operational efficiency across the entire account opening and lending process. Origence arc OS combines capabilities that make teams more efficient, such as autonomous account origination and data-driven decisioning. Better still, arc OS and arc DX work together seamlessly on a single platform to elevate the member experience at every touchpoint.

### Stay close to your members

With shared data from Origence arc DX, you can see how members are engaging with you to deliver a prime account and lending experience.

### Make better decisions faster

Choose from 1,800 variables to build custom rules and handle nearly any decisioning strategy.

### Plug into your partners

Integrate with most major core processors as well as credit bureaus, ID verification providers, external decision engines and more.

### Increase staff productivity

Features such as configurable workflows and built-in document mapping reduce extra steps, accelerate processes and promote timely follow-through.

### Support multiple loan types

Origence arc OS lets you seamlessly manage new accounts and nearly any type of consumer loan, including credit card, auto, boat, RV, ATV, tractor, motorcycle, and personal loans.

### Tailor to your specific needs

Origence arc OS configures to your system specifications and performance criteria, providing flexible admin tools, ongoing updates and best-in-class support.
